Super 2D Brushes

Airetool Super 2D Brushes are for cleaning internally enhanced tubes. The brush is constructed from material that outcleans and outwears other tube brushes. Super 2 D Brushes have two cleaning diameters to assure all surfaces are being cleaned. The smaller diameter cleans the hard to reach internal surfaces of enhanced tubing, while the larger diameter lays back and cleans the minimum I.D. surfaces. These brushes are recommended for removing soft and light scale deposits.

Super Brushes

Super Brushes are for cleaning smooth bore tubing. They are made from the same long-lasting material as the Super 2D Brush. The longer brush cleaning surface reduces the tube cleaning time. They are recommended for removing soft and light scale deposits.
